CURRICULUM OVERVIEW

Our 'learn through play' curriculum incorporates character values, cognitive, physical, social, emotional and language experiences, and most importantly - lays the foundation for your child's future academic success.

With this in mind, the Y in Central Maryland has implemented a Maryland State Department of Education Approved Preschool Curriculum into all of our Y Preschool programs. These resources promote the development of the whole child - socially, emotionally, cognitively, and physically. Our curriculum consists of skills and activities that provide children with solid, coherent foundations for later learning in kindergarten and beyond.

Our curriculum identifies goals in the following areas of development:

LANGUAGE

To help children gain literacy skills and oral language skills.

COGNITIVE

To help children become confident learners by letting them try out their own ideas and experience success, and by helping them acquire learning skills such as problem solving, asking questions, and using words to describe their ideas, observations, and feelings.

SOCIAL - EMOTIONAL

To help children experience pride and self-confidence, develop independence and self-control, and have a positive attitude towards life.

PHYSICAL

To help children increase their large and small muscle skills and feel confident about their bodies.

LESSON PLANS

Y Preschool teachers create weekly lesson plans based on MSDE-approved unit plans. The curriculum and the unit plans are created by Y curriculum specialists and reviewed annually by the teaching teams, giving them an opportunity to provide feedback on an ongoing basis.

All activities included in the lesson plans are designed to meet age-appropriate goals and objectives. We tailor our lessons to meet the developmental needs of each individual student to the best of our ability. A curriculum overview is shared with parents on a weekly basis.
